

Unveiling the Completion of an Architectural Masterpiece: Woodgrain Battens at Taronga Zoo

We are excited to announce the successful completion of our latest design project at Taronga Zoo, featuring our bespoke woodgrain-finished battens, crafted from LoCal Aluminium. This installation marks a significant achievement in merging aesthetic sophistication with high-performance materials, showcasing our commitment to excellence in architectural design.

Project Highlights:

- **Architectural Excellence:** Our LoCal Aluminium battens, measuring LDD 100 x 50 and featuring a two-part Male and Female Profile, were installed with meticulous precision to ensure a seamless and refined finish of approximately 300 square meters.

- **Elegant Design:** The woodgrain finishes—Link Java, Link Poplar, and Link Royal Oak—were carefully selected to introduce natural warmth and sophistication to the zoo's environment. These finishes enhance the visual appeal and create an inviting atmosphere for visitors, seamlessly integrating with the zoo's unique aesthetic.

- **Innovative Materials:** The battens, made from LoCal Aluminium, offer not only remarkable durability but also a sleek, modern appearance. The choice of LoCal Aluminium reflects our commitment to using high-quality materials that provide both structural integrity and aesthetic elegance.
